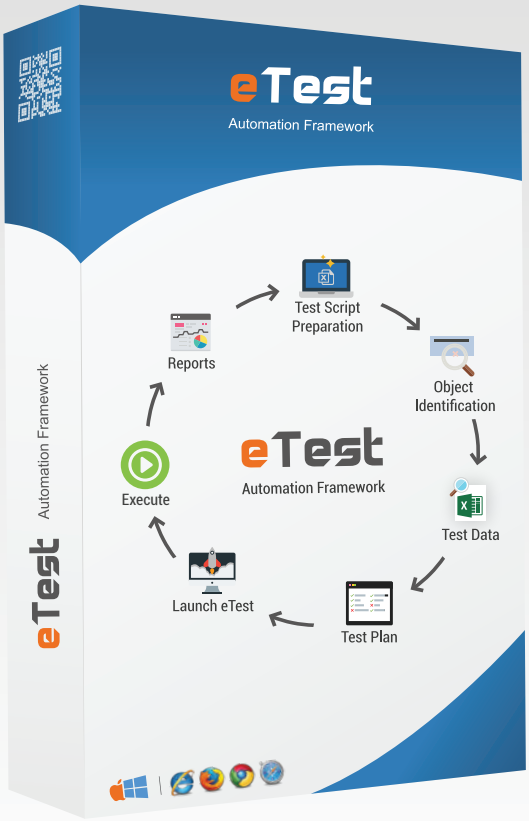
eTest

eNoah's Automated Test Factory

Automation Testing Made to Fit Your Requirements like Never Before

eTest Automation Framework that

BEST MEETS ALL YOUR REGRESSION NEEDS



eTest - Features

- Script Converter
- Centralized Repository
- Robust Reports
- Excel Keywords

eTest - Product of eNoah iSolution (ISO 27001 & Hipaa Certified Company)

OVERVIEW

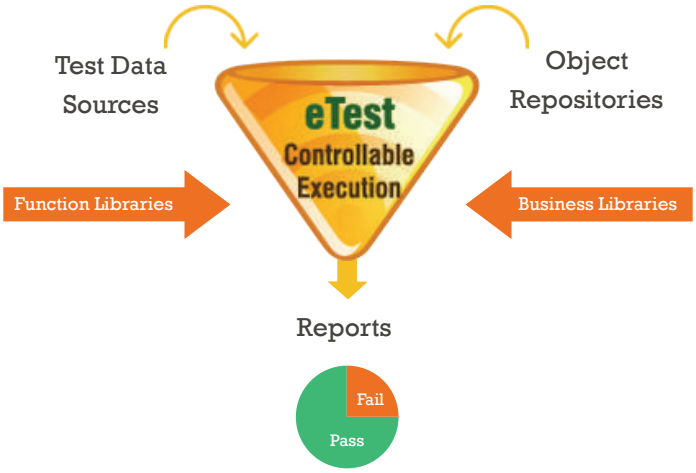
The increasing complexity of today's product development makes verification a time consuming activity, involving tremendous manual effort as well. Given the reduced time-to-market scenario, this puts extra pressure on the verification process.

Organizations are looking beyond their walls in pursuit of continuous improvement of processes that result in increased Productivity and efficiency.

eNoah brings a unique experience through eTest Frameworks.

eTest is an integrated testing approach and expertise in automated Testing, which already has all the intelligence of performing the manual actions on any web related objects.

eTest guidelines can be tailor-made to specific requirements in any domain, technology or specific type of testing



eTEST AUTOMATION FRAMEWORKS

- ✓ SELENIUM
- ✓ SAHI

The frameworks (built on Java) integrate the Function libraries, Object Repositories, Test data sources, and various reusable functions to produce the business requirements in the form of reports.

SELENIUM

2.9.1.1

SAHI

V3.0

eTest Reports

- ✓ eTest Summary Report
- ✓ eTest Detailed Report

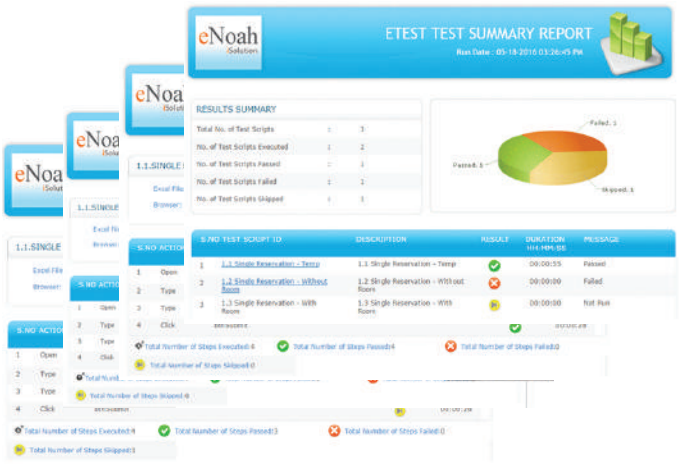
The Framework supplies two robust test reports after each Test Plan Execution. The summary report is generated with respect to the Test Plan and Detailed report is generated with respect to Test Steps of each Test Script .

Summary Report

Overall Summarization of the Test Plan execution result is included in the summary report with a graphical representation of the Total Passed, Failed & Skipped Test Scripts in the Test plan.Status of every Test Script of the Test Plan is generated in this report along with the time taken for each Test Script execution.

Detailed Report

Detailed report will include the execution status of all the Test steps in the Test Script which are executed.It includes the execution summary of the Test steps and the time taken for each test step execution.In case of Test Step failure, the detailed report displays the reason for failure.



eTest Differentiators

eTest Automation Products are highly user friendly and simple to implement. The Products are designed to fit the customer requirements.

eNoah has in-depth knowledge in Automation that lay the foundation for building the frameworks.

Features	eTest	Selenium
Record & Play back	✓	✓

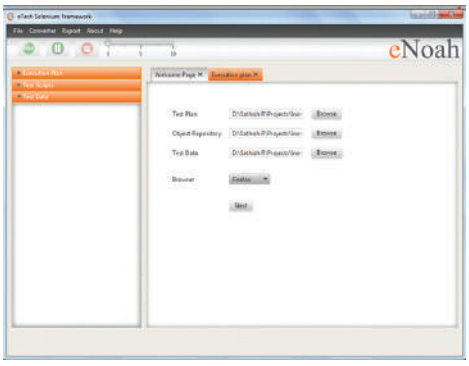
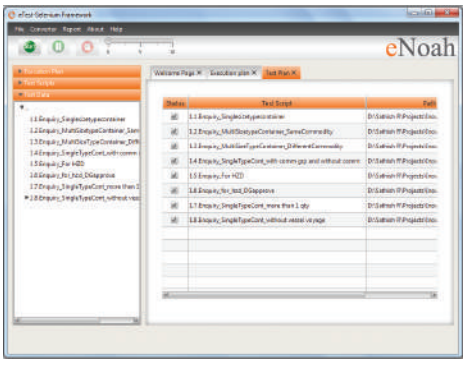
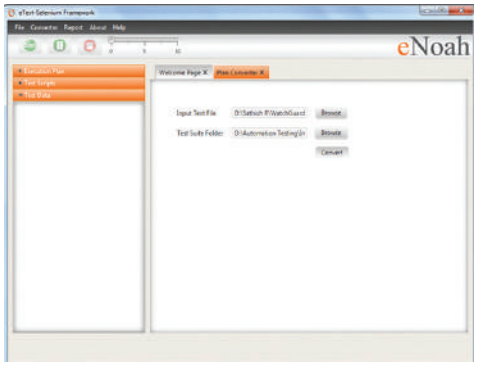
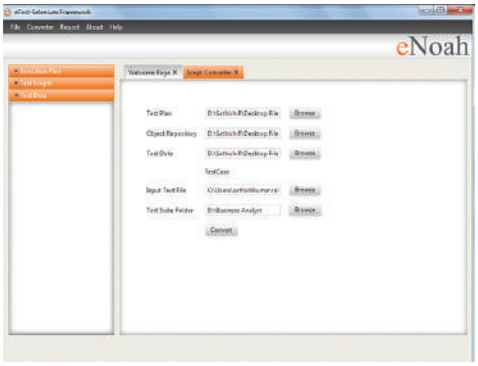
Technical Expertise	✗	✓
Test script convertor	✓	✗
Test scripts inputs from excel	✓	✗
Hybrid Framework	✓	✗
Flexibility of Cross Browser Script Execution	✓	✓
Robust test reports	✓	✗
Extendable framework as per the customer needs	✓	✗
Runtime Output Data Capture	✓	✗

eTest Automation Frameworks









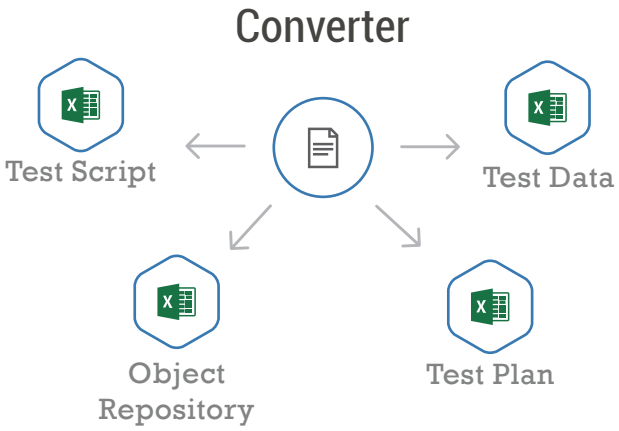
KEY FEATURES

Business Benefits

- Faster ROI
- Focus on customer business objectives
- Reduce Maintenance cost
- Reduce Effort
- Increased regression coverage

eTest Features

- Robust automation framework
- Light Weight System
- Easy maintenance of Test Assets
- Automatic Selenium Script converter (Text File to Excel)
- Execution control from UI
- Predefined Reusable functions
- Validating and verifying data
- Simple Keyword driven Excel Scripts
- Centralized Object Repository
- Consistency across the test runs
- Extensive report generation
- Minimal Manual Intervention
- Supports Multi Browser operations
- Platform and application independent



Light Weight system

Minimal Effort Maximum Benefit

Robust Reports
